GREETING ____

To Our Friends and Customers.

* * *

N issuing this, our Annual Catalogue for 1897, we wish first, to heartily thank our friends, who have so generously favored us in the past, and to say to all, that the same **High Class** goods, which have made our customers our friends, and which it has always been our ambition to place before the public, will be found throughout our departments, and all customers will be courteously and faithfully served, and every order promptly filled.

In our Catalogue will be found the names of well known standard varieties of seeds, proven by growing, to be the most valuable of their kinds for this climate, and no new varieties or novelties will be offered you, except those in which we have the fullest confidence, and which will be worthy of your attention.

Complaints sometimes made that seeds are not good, may quite as often be attributed to other causes, as to the quality of the stock. There are many things to prevent even the best seeds from always giving satisfaction, such as sowing too deeply, into too wet or dry soil, cold weather, insects, etc., so that it is impossible for us to be responsible in any way for the crop; but we assure you that the selection of, and contracts for growing of our stocks, has been given much time and skillful attention.

Market Gardeners, requiring large quantities of Seeds, are invited to write for special prices.

We forward seeds by Mail or Express as the purchaser may wish.

All sums to the amount of one dollar and upwards may be sent at our risk if forwarded according to the following directions, viz: by Post Office Money Orders, Bank Drafts or Cash sent in a registered letter.

In sending an order please give your Name, Post Office, County and State in full, as plain as possible; your name especially written very distinctly. We receive many letters without the signature of the writer, which causes much trouble to us and anxiety to them. Please be particular in this respect.

Greenhouse plants of every description can be furnished at short notice.

In shipping we make no charge for delivery to railroads or express companies.

Boxes, Bags and Barrels charged at cost.

Very respectfully yours,

KENDALL & WHITNEY.

SPECIAL NOTICE.

While we exercise the greatest care to have all Seeds pure and reliable, we do not give any warranty, expressed or implied. If the purchaser does not accept the goods on these conditions, they must be returned at once. Kendall & Whitney.

* * FLOWER SEEDS.

THE SOIL AND ITS PREPARATION.

and part from from from from from from from

BEST soil for annuals and for most flowering plants, whether biennials or perennials is a light rich loam. In such they grow readily, and attain to great perfection of bloom with but little care. By the application of proper manures, sand or clay, they can be brought to such a condition as to answer all the purposes of a flower garden. Deep and thorough trenching in the autumn, if possible, and the application of very old decayed manure or leaf mould, will give the amateur a well prepared and suitable soil.

Where the soil is too light, a thin layer of clay, if to be had, should be spread over the surface in the autumn, and dug in, after being pulverized by the winter frosts in the spring. This, with the use of old manure—that which has lain a year or more, and been frequently turned over till it becomes thoroughly decayed—will keep the garden in good condition. No unvarying rules can be given; much must be left to the judgment of the amateur. He must understand that the soil of a good garden should be deep, well pulverized, friable and rich.

Where the flower garden is a specialty, then more pains ought to be taken, and those who are about to do this, if they have not the requisite information, will consult something more than a catalogue. Our hints are intended for the mass of the people who love flowers, and do not wish to incur great expense in the gratification of their taste.

PERIOD FOR SOWING.

This must depend much upon the season as well as the locality. As a general rule, the proper time to commence sowing is about the middle of April; though a few sorts may be planted as soon as the ground can be got ready; and for a succession the sowing should be continued until June. In the Southern States of course, January, February, or March will be the time to sow, as they correspond with April, May and June at the North. To avoid all danger of injury, the sowing may be deferred till the last of April, but when a little labor is of no consideration the sowing may be made earlier, and in case of failure or injury from frost or wet, another sowing may be made when the weather is more favorable. Because we recommend April, it is not to be understood the sowing must be made at that time. If sown in any part of May, they will flower later, but abundantly throughout the latter part of the summer.

It is the great error to cover too deeply; and the cause of more than half of the complaints against seedsmen of selling old and worthless seeds come from inexperience and want of judgment in sowing. No rule can be given in this respect; but as a general guide, all large seeds, such as Sweet Peas, Lupins, etc., may be sown half an inch deep—smaller, less, and for the smallest, Clarkia, Pinks, etc., a covering of one-sixteenth of an inch will suffice. If sown too deep they are longer in germinating, and are liable to decay. Avoid the general error of sowing the seeds too thickly, as it causes an elongated and feeble growth, which no subsequent thinning will entirely remedy.

As soon as the seedlings have made three or four leaves, and are an inch high they should be thinned out. If they are kinds which will bear removal, they may be replanted in vacant spaces in the border. Tall growing plants with spreading branches will require more room than slender

growing dwarf kinds. Stir the soil around the plants from time to time; and, if they appear crowded, a second thinning will be of great benefit to those that remain. If the growth is not strong from the nature of the soil, apply occasionally a very small amount of guano or bone dust.

Transplanting should if possible always be done in cloudy weather, and toward evening. If the soil is dry the plants will require a light watering, to settle the earth around the roots, and if warm, sunny days succeed the operation, they will root all the better to have shade for a day or two. All large growing plants should be transplanted singly; but many of the smaller may be removed in patches without any trouble. After the plants are established, they will need no other care than to tie up the taller growing sorts to stakes, to prevent the wind and rain from beating them down, and injuring their blossoms.

GARDEN REQUISITES.

There are several aids to the economical management of the garden, which are almost indispensable, one of these is the hot-bed frame for the forwarding of plants for early planting. A frame made of various sizes, according to the size of the garden, from four sashes upward. The length of sash is generally seven feet by three and a half wide, the size of glass six by eight inches, making the entire frame of sashes fourteen by seven feet. The frame should have a southern or a southeastern exposure; should be made up of fresh horse manure, and a few leaves mixed with it; this must be laid in a heap preparatory to being used, and when in proper state of fermentation, prepared for the reception of the frame. A few inches of rich, loamy soil must be spread over the manure; then cover the frame with the sashes, and after standing a few days to allow the rank heat and steam to pass off, the seed can be sown. Where the ground is well drained, a better plan is to dig out a space the size of the frame, one or two feet deep, according to the season and the heat required, in which the manure is placed, care being taken to pack firmly and evenly.

Seeds for Associations or Clubs.

The following seeds may be selected from our Catalogue, at the prices named, and will be for warded, postage free, to any part of the United States:

NEW SWEET PEA "RED RIDING-HOOD"

OF FANTASTIC FORM

FASCINATING COLOR

FRAGRANT AS THE ROSE

* * *

In this variety we have a fixed type, and an absolutely new departure in form. When fully developed, the standard and wings are a pleasing rosy pink, shading to blush white at the calyx; the keel, which is almost completely enveloped, being nearly pure white. Although unusually robust in habit, it is early flowering, and in plentitude and continuity of bloom it excels all other existing sorts. The fragrance surpasses, in a marked degree, that of other varieties of Sweet Peas. The length and rigidity of the stems are remarkable; they run eighteen inches long and over, and, when cut, the stem and bloom retain their stability for a much longer period than other sorts.

Per Packet, - - 15 cts.

Eclipse Pea. This pea is claimed by the introducer to be the earliest variety yet grown, being a vigorous grower and a large producer. Pods of good size and true American Wonder in shape. Seed green and wrinkled, and of sweet and delicious flavor. Owing to earliness, productiveness, size of seed, quality and height of vine, this is destined to be the coming Pea for family use.

Per Pkt., 15c.; Pint, 40c.; Qt., 65c.

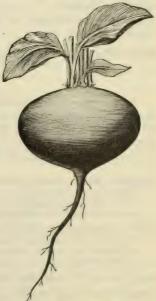

Dirigo Extra Early Beet.

THE EARLIEST VARIETY IN CULITVATION,
UNEQUALLED IN QUALITY.

It originated with a leading market gardener, and was brought to perfection after years of careful cultivation.

It is a rich, blood-red beet of fine grain and flavor, is earlier than either the Egyptian or Eclipse, of smooth and rapid growth; top and tap roots being very small.

Market gardeners should not fail to give the Dirigo a trial.

Per Pkt., 5 cts. Per Oz., 10 cts. Per 1-4 lb., 30 cts. Per lb., 90 cts.

GENERAL LIST OF &

Vegetable Seeds.

% % %

We forward seeds by Mail or Express as the purchaser may wish. When ordered by mail, add postage for Beans and Peas at the rate of 15 cents per quart and to Corn 10 cents per quart to Catalogue prices.

Half pounds furnished at Pound Rates. Half bushels furnished at Bushel Rates.

ASPARAGUS.

Sow early in May, thinly, in rows, one inch deep and two feet apart. The next season plant in drills, two inches deep and two feet apart, spreading the roots well out, in ground thoroughly manured and trenched, at least two feet deep.

In consequence of the great bulk of Asparagus Roots we cannot send them by mail.

ENGLISH BEANS.

Plant as early in the spring as the ground can be worked, from two to four inches apart, in drills from twenty-four to thirty inches apart. As soon as the plants are in full blossom, and the lower pods begin to set, pinch off the tops; this will insure the filling of the pods and hasten the maturity of the seed.

BEANS-Dwarf or Bush.

A succession of sowings can be made from the first week in May until August. Plant in drills about two inches deep, and from eighteen inches to two feet apart, according to the richness of the soil; the poorer the soil the closer they can be planted; the plants should be about three inches apart.

One quart is sufficient for one hundred feet of drill; 11/2 bushels for one acre in drills

one quarter of the manual cut of write, 1/2 energed one were the	,, ,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,

BEANS-Pole or Running.

These are more tender, and require rather more care in culture than the bush beans; they succeed best in sandy loam, which should be liberally enriched with short manure in the hills, which are formed according to the variety, from three to four feet apart; from five to six seeds are planted in each hill, about two inches deep.

One quart will plant one hundred and fifty hills; ten to twelve quarts to the acre.

BEET.

The best results are obtained on a deep, rich, sandy loam. For early use, sow as soon as the ground will admit, in drills fourteen inches apart, and thin to four inches; for the main crop, sow the first week in May, and for winter use as late as June. The soil should be deeply manured and well cultivated. In lifting and storing the roots, care must be taken that they are not bruised.

One ounce to fifty feet of drill; six pounds to the acre.

White Cape.	Very white; sure to head; standard sort	. ,05	.30

BRUSSELS SPROUTS.

Produces from the stem small heads resembling cabbage in miniature. The sprouts are used as greens, and become very tender when touched by the frost. Sow in May and manage as winter cabbage.

CABBAGE.

The Cabbage is one of the most important vegetables, and some of its varieties are universally cultivated. The ground must be highly manured, deeply dug or plowed, and thoroughly worked, to insure good, full sized heads. A heavy, moist and fresh loam is the most suitable. The early sorts should be sown very early in the spring, in hot beds, or later in the open ground. Eighteen inches by three feet apart is the common distance.

One ounce will produce about 3,000 plants.

heads; very reliable and much esteemed for family use	.05	.20	.60	2.00

CARROT.

Carrots require a very finely pulverized soil, to grow them to perfection. A good, light, and well enriched sandy loam is the best for this crop. For field culture, sow in drills, three to three and one-half feet apart, so as to cultivate by horse. Market gardeners sow in drills about eighteen inches apart and cultivate by hand. For early crops, cover one-half an inch deep, and thin to six inches apart, in the rows; for late, cover three fourths of an inch deep, and thin to four inches.

One ounce to one hundred feet of drill; three to four pounds to the acre.

Per Pkt. Oz. 41b. Lb.

CELERY.

To have Celery early it should be sown in a hot bed, quite early in the spring, and when three inches high, plant out in a well prepared bed, which must be covered in frosty weather. For the principal crop, sow early in spring, very shallow in the seed-bed, and when the plants are about six inches high, transplant them six inches apart into trenches for blanching. Dig the trenches four feet apart, a foot wide and ten inches deep. Fill in five or six inches of well rotted manure, and mix thoroughly, half a spade deep, with the earth at the bottom. The tops of the plants should be shortened before they are set. Earth up to blanch, three or four times during their growth, taking care that no earth falls in the centre of the plant.

MUSHROOM SPAWN.

Mushrooms can be grown in the cellar, shed, or any dark room under a temperature of 50 to 60 degrees. If practicable divide your place in narrow beds three to five feet wide, prepare your ground by thoroughly mixing one part of common garden soil with two parts of fresh horse manure, free from straw or litter. This well mixed compound should be filled in your beds 12 to 15 inches deep and pounded down as much as possible. Fermentation will set in at once and after the temperature of your soil has declined to about 85 or 90 degrees, the bed is ready for spawning.

Attention from the first in the preparation of manure is one of the most essential points, then its condition when made into a bed, respecting the temperature at the time of planting the spawn. Make holes in your bed about ten inches apart, each to hold two or three pieces of spawn about the size of a walnut, then cover the same with two inches of light soil, pressing it solid all over the bed. In order to hold an even moisture in the soil protect your beds with three to four inches of straw, and if the surface should become a little dry, moisten this protecting straw carefully with lukewarm water. If the temperature is right mushrooms will begin to come up in about six to eight weeks, and the bed will continue bearing for about a month.

English Spawn. In bricks, per lb., 15 cts.; 8 lbs., \$1.00.

By mail, add 10 cents per pound for postage.

MUSTARD.

A pungent salad used with Cress. The seed is used for flavoring pickles, etc. Sow in May thickly in rows and cut when two or three inches high.

PARSNIP.

Sow as early in the spring as the weather will admit, in drills fifteen inches apart, covering half an inch deep. When well up, thin out to five or six inches apart in the rows. Unlike carrois, they are improved by frosts, and it is usual to take up in the fall a certain quantity for winter use, leaving the rest in the ground until spring, to be dug as required.

One ounce for 200 feet of drill; five pounds to the acre.

Abbott's Improved or Long Smooth. Smooth and quite large; one of the best		*	
Hollow Crown. Roots very long, growing mostly below the surface of the ground.	.10	.20	.50

PEAS.

Peas for an early crop, should be sown as soon as the ground is in working condition. The soil for their reception should be light, dry and well sheltered. Mild manure, such as leaf mould, has a beneficial effect; but for many of the varieties, the soil cannot be too rich. For general crops, the ground should be well manured the previous year, which causes them to yield more abundantly. When grown as a market crop, peas are never staked, and are sown in single rows, two or three inches deep, and from two to three feet apart, according to the variety or strength of the soil. When grown in small quantities for private use, they are generally sown in double rows, six or eight inches apart, and the tall varieties staked up by brush.

One quart to 75 feet of drill; two to three bushels to the acre.

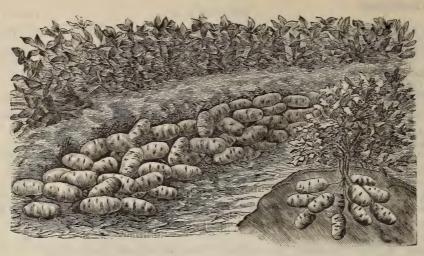

Peas ordered by mail are subject to an extra charge of fifteen cents per quart for postage. Pints furnished at quart rates.

Per Ot. Pk. Bu.

Extra Early.

Cleveland's Alaska. The earliest pea known, being very uniform in growth and almost entirely free from sports or runners. 90 per cent. of the pods can be gathered at the first picking. The dark green color of the pods makes it extremely desirable, as it can be carried long distances without losing color, which quality, combined with its earliness and uniformity of ripening, makes it the most desirable extra early for market gardeners ever offered. TURNIP.

Turnips thrive best in rich, sandy, gravelly soil. The earliest varieties can be sown as soon as the ground can be worked, either in drills or broadcast. For a succession, sow at intervals of a fortnight until the last week in July, from which time until the end of August sowings may be made for the fall and main crops.

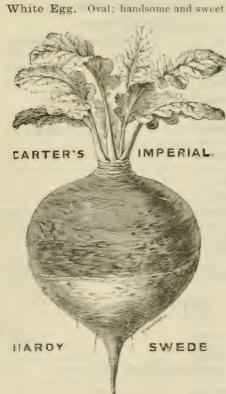

One ounce for 150 feet of drill; one to two pounds in drills for

To keep the roots fresh during the winter, they may be placed ried with dry sand.

Sweet and Medicinal Herbs.

No garden is complete without a few herbs for culinary or medicinal purposes, and care should be taken to harvest them properly. This should be done on a dry day, just before they come into full bloom, then dried quickly and packed, entirely excluded from the air. Sow in spring, in shallow drills, one foot apart and when well up thin out or transplant to a proper distance apart.

BRADLEY'S ____ COMPLETE MANURES.

The universal use of Bradley's Complete Manures by thousands of the largest Market Gardeners of this country, for many years, proves that they have found them to be unequalled for quickly growing the largest possible crops of delicately flavored, uniform sized, and richly colored vegetables.

They are manufactured of the choicest plant food materials, so combined and prepared as in every sense to be a "complete fertilizer" for all crops.

One season's use always demonstrates their excellence and crop producing powers. We therefore urge every grower of market crops to determine their superlative merits for himself, by testing them this year on his own farm.

Send to us for descriptive Catalogue, giving full particulars regarding the four brands of Bradley's Complete Manures, and special directions for using them on all market garden and field crops.

THE WORLD'S BEST BY EVERY TEST.

Bradley's Standard Fertilizers

have for 36 years led the world as crop producers, because of their high agricultural value, and superior mechanical condition.

The best farmers everywhere use them with unvarying success, and increasing confidence every season.

We freely recommend the "Bradley" brands to all of our patrons, recognizing that in every grade fertilizer "Bradley's" productions will invariably give the greatest satisfaction upon all varieties of crops, and under every condition of soil.

Be sure and send to us for their Catalogue, before purchasing any fertilizing materials, and learn our prices for their absolutely superior goods.

We would call especial attention to the following brands, which easily take first place wherever used:

BRADLEY'S SUPERPHOSPHATE.

A high grade fertilizer of superlative value, for general use, either with or without stable manure.

BRADLEY'S POTATO MANURE.

The best potato grower known. It is used by leading farmers everywhere, and always produces large crops of smooth, sound potatoes.

BRADLEY'S COMPLETE MANURES

for all crops are beyond question the richest and most concentrated fertilizers made, and are especially adapted for intensive farming. See full page description on page 38.

BRADLEY'S SEEDING DOWN MANURE

is used by the best hay farmers, with marked success. It furnishes just the dressing needed for seeding down, and will repay its cost by the first season's hay crop, and greatly increase the fertility of the soil for years.

We carry a full stock of these goods constantly on hand, and can fill all orders promptly and at very low prices.

SHEEP MANURE.

This is a pure natural manure and the most nutritious food for plants. Its effect is immediate and lasting, it is clean to handle, and is the best of all manures for mixing with the soil for greenhouse plants. As a lawn top-dressing it is unequaled. For mixing with soil, take one part manure to six parts soil. For making a liquid, take one pound manure to five gallons of water, which can be used with safety daily if necessary.

Price. -5 lb. package, 25 cts. 10 lb. package, 40 cts. 100 lb. bag, \$2.00.

PURE GROUND BONE. 4 to 5 per cent. ammonia; 21 to 23 per cent. phosphoric acid. Per 100 lbs., \$1.80. Per ton, \$34.00.

Disinfectant Insect Powder, for use on all Animals, Poultry and Plants. Also in Hotels, Houses, Jails, Saloons, Stables. Kennels, Hen Houses, etc., to destroy Vermin and as a D. Disinfectant Insect Powder, for use on all Animais, Poultry and Plants. Also in Hotels, Houses, Jails, Saloons, Stables. Kennels, Hen Houses, etc., to destroy Vermin and as a disinfectant. Not Poisonous or Explosive. It is also the best article to prevent Moths and Carpet Bugs from destroying clothing, furniture, carpets, furs, robes, etc. 1 pound boxes, 125 cts., by mail 40c. 5 lb. bags \$1.00.

LION BRAND BORDEAUX MIXTURE.

This mixture is a scientific preparation and combined in a manner heretofore unknown, thus enabling the manufacturer to place it on the market in practical and usable shape, as by simply adding water and stirring, it is ready for use. It prevents Potato Rot, Potato Blight, Downey Mildew of Grape, Peach, Pear, and Cherry Blight, &c. 1 quart Cans, 40c.

"INCARNATIVE SHEEP DIP."

Incarnative Sheep Dip is highly concentrated non-poisonous liquid for Sheep Washing Purposes.—
Killing Ticks and Lice, curing Scab and promoting the growth of Wool and Flesh.
Used also for Cattle, Horses, Pigs, Fowls, Dogs, etc. A protector of Sown Seed from Birds, Slugs and "Smut."
Does not require heating nor any preparation, simply add cold water and it is ready for use. Easily applied and always effective.

Price, 75 cts. per quart.

LEGGETT'S PARIS GREEN OR DRY POWDER GUN.

The distribution of the powder can be so easily regulated that a half pound or a pound of Pure Paris Green or London Purple may be evenly distributed over an acre of Potatoes. By leaving only a slight opening in the slots at the bottom of the reservoir, the faintest smoke of powder can be forced from the gun.

Hellebore, Insect Powder, Slug Shot, Flower of Sulphur or Lime can be distributed better and more economically than in any other way.

Price, \$7.50 Each.

ACME POWDER GUN.

A Simple Practical Implement for the Extermination of

POTATO BUGS

and all Kinds of Insects, Flies, &c. the Pests of every House and Garden.

It will handle all insecticides in their dry state—Pure Paris Green, Hellebore, Persian Insect Powder, Etc. It is very effective in the destruction of Potato Bugs, Currant Worms and all like pests, and for the wholesale destruction of house flies, using freshly ground Persian Insect Powder, cannot be excelled.

Acme Powder Gun is well made, with a solid hardwood head block, hardwood handles, best leather for the bellows, (an extra elbow is furnished to tilt the funnel for getting under the leaves of plants and shrubs,) and is well finished throughout, making a neat, attractive and serviceable implement.

Price, \$1. Each.

No. 332. Myers Fountain Knapsack Spray Pump with one tube, rubber bulb and rose. Price \$3.00.

SYRACUSE SPRING TOOTH HARROW.

Frame, Tooth bearing Bars and Teeth are Steel. The frame runs on Steel Shoes which can be renewed at small expense. All Castings Malleable. Superior Work. Most convenient for clearing and turning about or transporting from place to place.

This style of Harrow has advantages over the ordinary float Harrow, in that the depth of work can be quickly changed even while the Harrow is in motion, and by operating the levers a uniform depth can be maintained in soils of variable hardness.

15 Tooth.	, Two Horse, with plain teeth	4.00
17	Two or Three Horse, with plain teeth Price 1	5.00

"Buffalo Pitts" HORSE Spring Tooth Harrow.

The only Lever Spring-tooth Harrow having extra spring action on lever, thereby taking off the strain on the teeth. The lightest and easiest draft of them all. Strong and durable, and thoroughly braced.

	Tooth, Two Horse		\$14.00
16	Tooth, Two-Horse	66	14.50
17	Tooth, Two-Horse	66	15.00

"BUFFALO PITTS"

LEVER SPIKE SPRING HARROW.

The only Harrow having SPRING ACTION upon SPIKE TEETH.

PRICE \$11.00.

"BUFFALO PITTS" All-Steel, Spring-Flexible, DISK HARROW.

With Solid or Spade Cutting Blades.

The only Disk Harrow in the World having independent adjustable spring pressure upon the inner end of each gang of disks, allowing any amount of pressure to be thrown upon the inner ends of the gangs by the foot of the operator. Price \$20.00.

"BUFFALO PITTS" All-Steel, Spring-Flexible, CUTAWAY DISK HARROW.

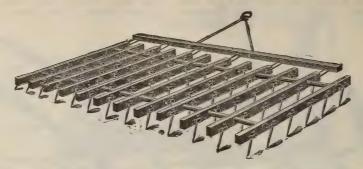

WITH SPADING OR SHEAR CUTTING BLADES.

Especially adapted for stony land, or hard and lumpy soil, the only pressure upon opposite disks with no weight upon the horses' necks while working.

PRICE:-16 inch_Disk,:\$20.00; 20 inch Disk, \$25.00.

CLIPPER SMOOTHING HARROW.

The teeth being convertible merely by change of hitch from perpendicular to slanting, it combines all the principles of two harrows in one. The superiority of having teeth in a slanting position is beyond doubt or question, as they cut and pulverize the soil thoroughly without clogging leaving the trash under the soil.

It is also excellent for cultivating corn, potatoes and other crops when small.

Price, Two Sections Reversible, 48 Round Steel Teeth, \$11.00.

Price, Three Sections Reversible, 72 Round Steel Teeth, \$15.00.

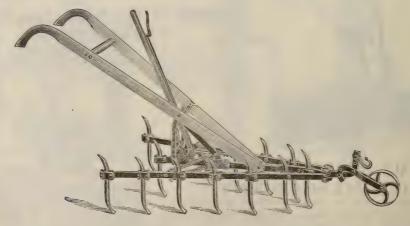

The Yankee Pulverizer.

Combining late improvements in Disk Harrows.

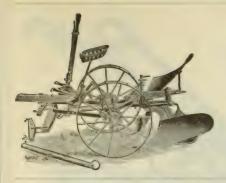

Price \$24.00. Extra for Scraper Attachment \$2.00. Extra for Neck Yoke, Whiffletree, and Evener, \$2.00.

Syracuse Spike Tooth Cultivator.

Especially adapted to pulverize the soil and leave it smooth and level. The Teeth are reversible and the pitch can be quickly changed forward or back by simply loosening one bolt at each tooth.

Expanding Lever, fourteen Spike Teeth and Wheel. Price \$4.00.

National Reversible Sulky Plow.

The only successful Sulky Plow made that will plow stony, rough, Side Hill or Level Land.

ONLY NEEDS TO BE TESTED TO BE APPRECIATED.

.THOUSANDS IN USE.

Of Light Draft and Easily Handled.

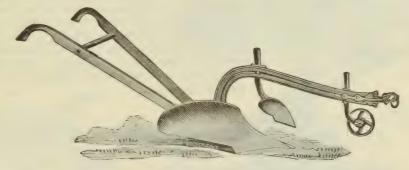

Descriptive Catalogue and Price mailed on application.

THE YANKEE SWIVEL PLOW.

The most perfect working Reversible Plow we have ever offered. It has a wood beam, patent steeled metal mouldboard, with patent steel shifting lever and clevis, enabling the plowman to take any desired width of furrow without stopping his team. Manufactured of superior hard metal in four different sizes. For full information and prices, send for Yankee Plow Catalogue.

Syracuse Steel Beam Steel Plows.

All parts Steel. Workmanship and material of the very best grade and quality attainable. Superior turning qualities; will turn a furrow smoothly up or down on sloping land. We also have a full line of

T. B. HUSSEY'S HARD METAL AND STEEL

J. J. FRYE'S STEEL AND IRON PLOWS.

Descriptive Catalogue and Prices mailed on application.

The Lambert Plow Coulter.

With the aid of this Coulter better results can be obtained with less labor for man and team, than any other Coulter made.

It prevents clogging, lessens the draft and makes the plow hold easier and turns better, and it can be adjusted to make the plow land as little or as much as is desired.

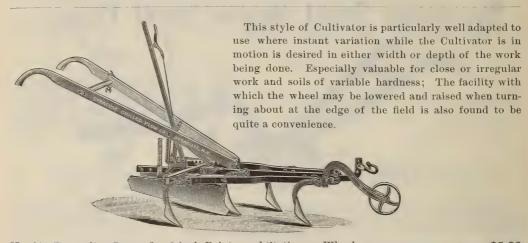

SIZE A, FOR FOUR-HORSE PLOW.

SIZE AA, FOR TWO-HORSE PLOW.

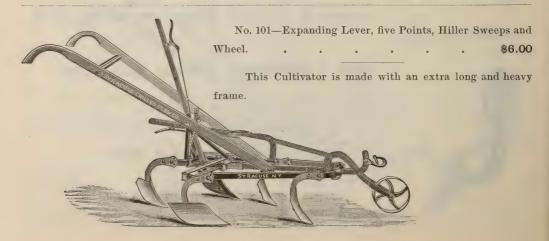

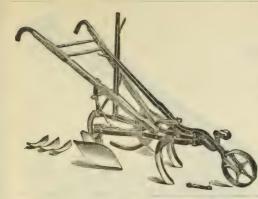

No. 83—Five 3 in. Points, Wing Points, Shovel Point and Wheel, Price \$4.00.

The Syracuse Cultivators are made almost wholly of steel. They are not only light and easily handled, but are strong and indestructible, and have many especially good qualities not found in the ordinary implement. All the points, excepting the shovel point are reversible, thus giving double wear. The wing points can be easily changed to throw more or less earth to or from the crop, as may be required, and the pitch of all the points can be altered by simply removing one bolt in each standard. Wheel standards are malleable or wrought iron. Clevises are malleable iron. The handles can be raised or lowered or shifted to the right or left.

No. 31—Expanding Lever, five 3-inch Points, and Stationery Wheel, \$5.00 No 138—Expanding Lever, five 3-inch Points, Wing Points, Shovel Point and Lever Wheel, \$5.50

"Planet Jr." No. 8, Horse Hoe and Cultivator.

We call special attention to the important points in the construction of this machine for 1897.

The Patent Frame. The Cultivating Teeth. The Pat. Side Standards, The Pat. Hoes, The Patent Hollow Steel Standards, The Wheel Lever. Patent Depth Regulator.

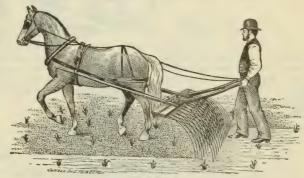

Price \$7.75.

Descriptive Catalogue mailed on application.

The Zephaniah Breed Weeders.

Without any doubt the "Zephaniah Breed Weeders" are the finest tools in their class, on the market. They will work all kinds of soils, and all crops grown in New England at a saving of from two-thirds to nine-tenths, the time usually required, and their timely use greatly increases the crops.

Weeders have come to stay, and within a very few years every farmer will have a Weeder just as surely as he has to-day any kind of a cultivating tool. We advise all our farmer friends to carefully investigate the subject of purchasing Weeders, and we confidently recommend the above make as one of the best. Descriptive Catalogue mailed on application.

NUMBER 4.

Price. Weight. No. 2. One Horse Sulky Weeder and Cultivator, head 12 ft. 6 in. \$37.00 " " " 8 ft. long, 30.00 No 3. " Walking Weeder and Cultivator, head 8 ft, long, No. 4. 100 4 (central section 2½ ft. long, with extensions.) No. 8. For onions and vegetables, head 1 ft. 6 in. long, on wheels, (other lengths made to order,) operated by one man, 10.00

Whitman's Adjustable Lever Weeder.

By using this Weeder in fields, corn, beans, potatoes, in fact any kind of vegetables can be kept clean of weeds without the labor and expense of the hoe and without damage to the plants.

33.00.

"BUFFALO PITTS" TWO-SECTION STEEL LAND ROLLER.

It is made entirely of steel; steel drums, wrought-steel heads, eel centre standard, steel end standards. There are, therefore, steel centre standard, steel end standards. There are, to castings about the drum to break and cause trouble.

20 inches diameter, 7 feet 6 inches long, price, \$28.00. 30 inches diameter, 7 feet 6 inches long, price,

The "Jewel" is capable of being quickly adjusted in depth or width of working, or height of handles. As shown in cut, it is provided with four slender stirring teeth, each one made of one piece of steel, unexcelled for thorough work, especially on hard soil; one pair of side shoes, particularly intended for use among small plants; also a pair of ploughs for throwing to or from the row, or for opening furrows. The standards of these hoes and plows are of malleable and wrought iron—no cast iron. Price Complete, \$5.00.

THE "GEM" SINGLE WHEEL HOE,

CULTIVATOR AND PLOW COMBINED.

Price Complete, \$3.75.

The "Planet" Jr." Double Wheel Hoe, Cultivator, Rake and Plow.

The equipment consists of 1 pair of curved point hoes, 1 pair of rakes, 1 pair of plows, 1 pair of narrow cultivator teeth, 1 pair of wide cultivator teeth, 1 pair of detachable leaf guards.

Price Complete, \$6.00.

THE "NEW MODEL" SEED DRILL.

The Most Perfect Drill in America.

In reference to the "New Model" Drill we do not think it necessary to enter into a discussion about the necessity for and economy in the use of Seed Drills. Farmers and Gardeners generally, we believe, are now well enough posted to understand and fully appreciate all these points. Suffice to say that the "New Model" is the result of careful experimenting in the field and factory, in close comparison with leading drills, and being constructed with the view of avoiding all radical defects of said drills, built in a workmanlike manner, of best material and in neat style and finish, venture to assert it will be found to be the best seed drill in use and indeed a model in every respect. Price, \$6.50.

"PLANET JR." No. 4 Hill Dropping Seed Drill, HOE, CULTIVATOR, RAKE AND PLOW.

We are pleased to offer for 1897 a new combined tool of great excellence. It combines conveniently in a single garden implement, a hill dropping and a continuous row seeder, with the most perfect and complete single wheel hoe, cultivator, rake and plow that the most practical can desire.

Price, complete, \$10.00.

The Racine Broadcast Seeder.

It will sow perfectly any quantity to the acre of all kinds of grain, Oats, Barley, Rye, Buckwheat, etc., or Grass Seeds, Clover, Millet, Timothy, Hungarian, etc. It will also sow Peas, Corn and Fertilizers; in fact, anything which requires broadcasting in a most satisfactory manner. It is the latest Wagon End Seeder on the market. Send for Descriptive Catalogue.

Price, \$10.00.

Pierce's Improved Cahoun's Patent BROADCAST SEED SOWER.

For Sowing Wheat, Oats, Barley, Rye, Buckwheat, Grass Seed, &c.

This hand machine sows from Four to Eight Acres per Hour, at a common walking gait.

A saving of four-fifths of the labor, and one-third of the seed used in hand sowing is effected by using this machine. A person entirely unused to sowing by hand can use it with perfect success. Warranted to give perfect satisfaction.

Price \$3.00.

THE IMPROVED

Robbins' Potato Planter.

This planter is one of the most thoroughly constructed machines offered to the farming public; it is carefully made of the very best materials and consequently is strong, durable and thoroughly practical.

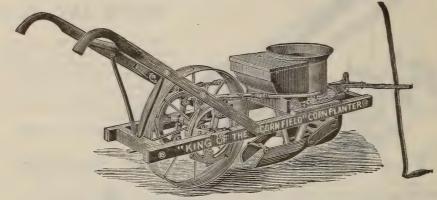

Price of Planter (plain) \$60.00 " with Fertilizer Attach-

ment. 70.00

SEND FOR SPECIAL CIRCULAR.

CORN PLANTER AND FERTILIZER DISTRIBUTOR.

PLANTS CORN, BEANS, PEAS, BEET AND OTHER SEED OF LIKE SIZE.

This planter is perfectly adapted to every requirement; durable and simple in construction; not liable to get out of order, in consequence of its having no gears, chains, or other complicated parts to break or wear out.

This machine is arranged to drop any desired quantity of seed or fertilizer at a time, at equal and various distances apart, in hills or drills of uniform depth. The seed dropping device is positive, never misses or skips a hill.

Price \$25.00. Descriptive Catalogue mailed on application.

KEMP MANURE SPREADER.

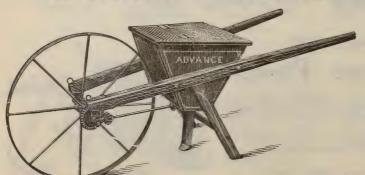

The Kemp Manure Spreader will evenly and thoroughly spread all kinds of manure found upon the farm, from the roughest and toughest down to the finest, including ashes in all conditions, wet or dry, and the time required to spread a load is from one and a half to two minutes without manual labor.

It can be regulated to spread different quantities of manure to the acre.

Price, complete with forward wheels, \$110.00. Without forward wheels, \$90.00.

ADVANCE FERTILIZER DRILL.

The increased use of commercial fertilizers has fairly compelled the farmer and planter of the present day to provide himself with improved appliances for properly and economically distributing these adjuncts of modern farming.

We claim the "Advance" to be the best low-priced distributor on the market, and would call attention to its distributing disc, of galranized iron, which can neither break nor rust; also to the wrought iron wheel, light and strong.

A first-class tool for the drilling of peas and corn.

Price1\$7.00.

THE WORCESTER BUCKEYE One Horse CHAIN GEAR MOWER.

This Machine cuts a four foot swath, has high drive wheels, and the draft is so light that the smallest horse can do a full day's work with the with perfect case.

Scythes never break.
Self Oiling Pitman (no oiling, no hot box).

Chafe Plates (take up the wear—maintain the shear-cut).

Foot Lift (lifts the bar higher than any other).

Foot Lift (lifts the bar higher than any other). Carrying springs (carries the weight of cutter bar on the wheels—no dragging by the horses). Quality (no accident or delay).

New Chain Gear Mower, 5 ft.

New Chain Gear Mower, 6 ft.

THE YANKEE HORSE RAKE.

Some of the Leading Points of Superior Excellence found in the Yankee Horse Rake are:

Simplicity in construction and excellent quality of materials.

Adaptability to rake anywhere, whether the fields are rough or smooth, or the hay green or dry.

Rake-head adjusted so as to balance the weight of the teeth.

This device (peculiar to the Yankee Rake) prevents the teeth from falling back heavily to the ground, after dumping the windrow. It also completely prevents the teeth from dragging heavily, and digging up old rubbish or filling the hay with dust and dirt.

Teeth run level with the ground at their points.

The Yankee has more teeth (which are placed nearer together) than most other rakes.

Teeth always made from the best crucible cast steel, tempered in oil.

A tooth can be inserted or removed in less than five seconds, and without disturbing any bolts.

Each tooth is perfectly independent in action and supplied with a yielding spring that will allow it to pass safely over any obstruction that the axle can pass over, saving at least three-fourths of the expense of broken teeth caused by pressure bars and guides used on rakes that CANNOT USE THIS PATENTED DEVICE.

PRICE, \$22.00

The New England Champion Horse Rake.

Warranted to Give Perfect Satisfaction in Every Respect.

High Wheels, Bent Shafts, the Strongest and Most Easily
Operated Dumping Device.

An Improved Oscillating Stripper Head, which can be readily raised when backing the horse; large and strong braces which make the rake run steadily; and *Sled Runner* or sword pointed teeth are among the valuable features of this rake.

PRICE. \$20.00

Sections for Mowers and Reapers

AT MANUFACTURER'S PRICES.

Farmers can have their orders promptly filled by sending directly to us for Sections for all kinds of machines.

Sections will be polished on both sides, and stamped with the name of the machine for which they are intended.

ALL KNIVES AND SECTIONS WARRANTED.

In ordering send size of Section wanted.

BULLARD'S IMPROVED HAY TEDDER.

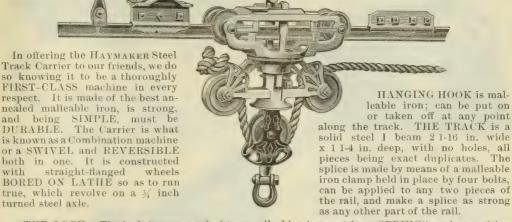

THE BULLARD IMPROVED HAY TEDDER having been submitted to the severest test of field work, is admitted to be the only one yet offered to the public that will thoroughly spread long, heavy grass, taking it up from the bottom, tossing it gently into the air, and leaving it light upon the ground for free access of sun and air.

By its features of construction its forks extend outside and in the rear of the wheels, thus the wheels are always inside and in front of the forks and no hay that has been tedded is run over and matted down, as is the case with all other hay tedders where the wheels are outside the

forks.

PRICE, \$35.00

The Haymaker Steel Track Hay Carrier.

THE LOCK.—The lock is composed of two malleable pieces with no SPRINGS, and a positive Force Lock, cannot get out of order. STOP is clamped to TOP OF TRACK, is and can be adjusted to any point desired. All rope wheels revolve on large bushings.

Horse Pitch Forks,

Single and Double Harpoon and Palmer Forks,

Also Hooks, Pulleys and Rope.

PHILADELPHIAS have maintained their supremacy over other Mowers made, because

Each can holds five gallons.

The Stoddard Churn.

THE MOST PERFECT CHURN MADE.

The Stoddard Churn is made by hand in the most thorough manner, and of kiln-dried white oak. It will last for years. The principle is concussion and not friction—has no floats or paddles inside. It is easily operated, easily cleaned.

Easiest Churn to get Cream into—Easiest Churn to get butter out of—Easiest Churn to keep Clean—Because the entire top can be removed.

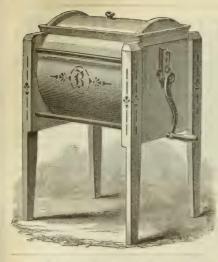

It is simple in its construction, and has no parts liable to get out of order. The Churn being air-tight, the cream is not affected by the temperature of the room while churning.

It fully meets the requirements of large or small dairies and is offered at a price within the reach of all.

It is especially adapted to the GRANULAR SYSTEM of making butter. The grain of the butter is perfectly preserved, which adds to its keeping

No.	PRICES—DAIRY SIZE.	Prices.
1	Ten Gallon Churn, churns from 1 to 4 gals. cream	\$ 6.00
2	Fifteen Gallon Churn, churns from 2 to 7 gals. cream	6.75
3	Twenty Gallon Churn, churns from 3 to 9 gals. cream	. 7.50
4	Twenty-five Gallon Churn, churns from 4 to 12 gals. cream.	
5	Thirty-five Gallon Churn, churns from 5 to 16 gals. cream	. 10.50
4 1/2	Forty-five Gallon Churn, churns from 5 to 20 gals. cream	. 12.75
6	Sixty Gal. Churn, churns from 6 to 28 gals. cream	

There is less liability of getting Churns too large than too small. Be sure and order Churns large enough. There must be room in the Churn to produce concussion, and a small Churn filled too full will require a longer time for churning.

The Blanchard Churn.

The following are the leading merits of the BLAN-CHARD CHURN:

Perfect quality of all materials used. Excellency of manufacture. Simplicity of construction, having no cog wheels or gearing. Durability. Ease of operation. The action of the dasher is such as to cause agitation of the cream by creating currents, and not by beating or by friction of the cream, which may injure the grain of the butter. Facility in removing the dasher and getting at the butter. Ease of cleaning, the form of construction making the inside without any inaccessible or invisible angles or corners.

BUTTER CARRIERS.

These Carriers are made of White Wood, are very strong, and will stand handling by Express Companies. The trays are so arranged that the butter is not marred in the least in handling. The ice box is made of zinc, and has two compartments: the top for ice and the bottom for the water as the ice melts; so the ice is melted by air alone, thereby lasting much longer than if the ice rested in the water. This arrangement has received the highest praise from those who have used it.

Ham's Tubular "Search Light" Lantern.

Reflector, 12 inches diameter, 7 inches deep.

No. 2 Burner.

1 inch Wick.

Finished in Blue Japan.

Just the lamp you want where a strong light is required, and to be spread over a large space, as in creameries, stables, saw and planing mills, warehouses, packing-houses, work-shops, pienic grounds, lawns, summer resorts, etc. The lamp throws a brilliant and steady light, and will burn as well out of doors as inside, without smoking or flickering, and is not affected by the wind or strong drafts.

Burner Cone Securely Locked. Always Works Easily

Price \$1.65 Each.

We have in stock a full line of all the leading Lanterns. Prices furnished on application.

PRAY'S PATENT ICE PLOW.

This plow is especially designed to meet the demand for a cheap and efficient ice cutter for farmers and dairymen. It will cut from 20 to 40 tons an hour, cutting the ice blocks of uniform size, which saves much labor when packing.

The Superiority of Pray's Ice Plow.

1st. It is the only plow that has a seat. The extra weight of the rider holds the plow to its work and allows the horse to be hitched much closer to the plow. An advantage where the pond is small and all the ice needed from the edge of the pond.

2nd. It is the only plow that can be successfully used by one person. The draft back of runners omits the necessity of leader or rider,

3rd. It is the only plow that has an adjustable tooth.

4th. It is the only plow that works with runners.

5th. It turns easier at the end of the row than any other plow.

6th. It cuts ice with more economy on a small pond than any other plow.

Upon a shallow pond where a saw cannot be used, this plow is indispensable. A horse and one man can cut as much ice as ten men with saws.

WARRANTED TO WORK AS REPRESENTED.

Price, Four-Tooth Plow,

\$16.50

Price, Six-Tooth Plow,

Bradley's Superior Meat-Meal.

The unprecedented success of **\(\xi^{\cuper}\) BRADLEY'S SUPERIOR MEAT MEAL''** for stimulating large egg yield, and quickly growing fine fleshed Broilers, has caused it to become very popular wherever introduced.

It is composed of Beef, Blood, and Bone, so combined in easily digestible form, that it furnishes the best possible food for growing Chickens and laying Hens.

A regular feeding of "Bradley's Superior Meat Meal" only costs 1 ½ cents a hen a month, and its free use makes poultry keeping very profitable.

PRICES:-100 lb. bags, \$2.00; 50 lb. bags, \$1.25.

Prolific Poultry Food.

Will Make Hens Lay in Fall or Winter.

PROFITABLE FEED AT ALL SEASONS OF THE YEAR.

The secret of getting eggs lies in supplying the hen with proper material. This is just what Prolific Poultry Food will do. It supplies all the Egg. Shell and Flesh-forming material necessary, and it stimulates nature to convert this material into Eggs. It is not expensive as one pound will last a dozen hens a month, and repay many times its cost.

The Improved Challenge Incubator.

This machine will meet the requirements of all who raise chicks, ducks, or turkeys,—hatching all equally well; and, unlike other machines, does not require an expert or genius to run it. Any man or woman can run one with perfect success, as it is perfectly self-regulating, with no complicated machinery to get out of order and perplex the operator.

The tank of water in the top of the machine radiates a perfect and uniform heat in all parts of the egg chamber, and the regulator being operated from the same source, it will readily be understood that the temperature must always be the same.

"IRON CLAD" STEEL BUSHEL BASKET.

These Baskets are made of cold rolled steel drawn from one piece and furnished with malleable iron handles. Aside from the general usages of baskets, the "Iron Clad" will be found by farmers especially, a very useful vessel for the purpose of boiling liquids or cooking food for stock.

White Mountain Ice Cream Freezers.

The manufacturers have perfected the White Mountain Freezer by the introduction of the new and important feature of a double self-adjusting wood scraping bar attached to the duplex dasher that has always been used exclusively in this freezer. By means of this device the actual time of freezing cream has been very materially reduced and with the White Mountain Freezer as at present constructed, cream of the finest quality can be frozen in only four minutes, or less than one-half the time required with any other freezer on the market.

An Illustrated Catalogue of Fly-Wheel Freezers, tubs and cans for packing purposes, repairs, etc., furnished free upon application.

Improved "Arctic" Freezer.

Features of especial merit:

A strong, waterproof tub, bound with heavy, galvanized iron hoops; a detachable hinge top frame, with all gearing completely covered, so that nothing can get between the cogs; Cans of best quality of charcoal tin plate, and a tinned beater with double self-adjusting wood scraping bar.

The Can of this freezer may be revolved after the beater is removed, which is an advan-

tage in freezing fruit.

The Arctic is positively the best freezer in the market of its cost, and second only to the White Mountain.

Combined Barrel Truck and Hand Cart.

Price Complete as shown, \$11.00

When we consider the almost innumerable uses to which our Combined Truck and Hand-eart can be applied, its "handiness" and the immense amount of time and hard labor saved by its use, it is not a matter of surprise that it is steadily growing into popular favor.

The barrel is raised from the ground, carried to the place desired and instantly detached, all without handling. The weight being balanced over the axle, no lifting or down pressure is needed

in transportation.

Other barrels for various purposes can be used as needed, extra trunnions being furnished if desired, which can be readily attached to any oil or spirit barrel, thus increasing indefinitely the value of the truck.

Trucks are now equipped with steel wheels -durable, strong and handsome.

No castings to break: all iron of best wrought.

Furnished with or without Barrel or Box, as ordered.

Truck only, price \$6.50 with barrel, \$8.50.

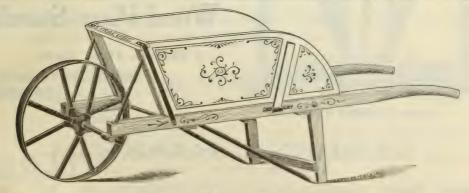

Price, Leaf Rack, \$4.50.

Have recently added a very light Leaf Rack, which will be found extremely convenient for the cartage of leaves, cut grass from the lawn, etc.

Knocks down flat, taking very little room for storage.

GARDEN WHEELBARROWS.

Prices: \$2.50 to \$4.00

CLOUGH'S ADJUSTABLE SIEVE.

In offering this Adjustable Sieve to farmers and others, we know that they will find it useful and valuable for separating foul seeds from grain, and sifting out the small grain, thereby getting the most vigorous kernels for feed; also for cleaning and sorting Beans, Peas, etc.

Price \$2.00.
